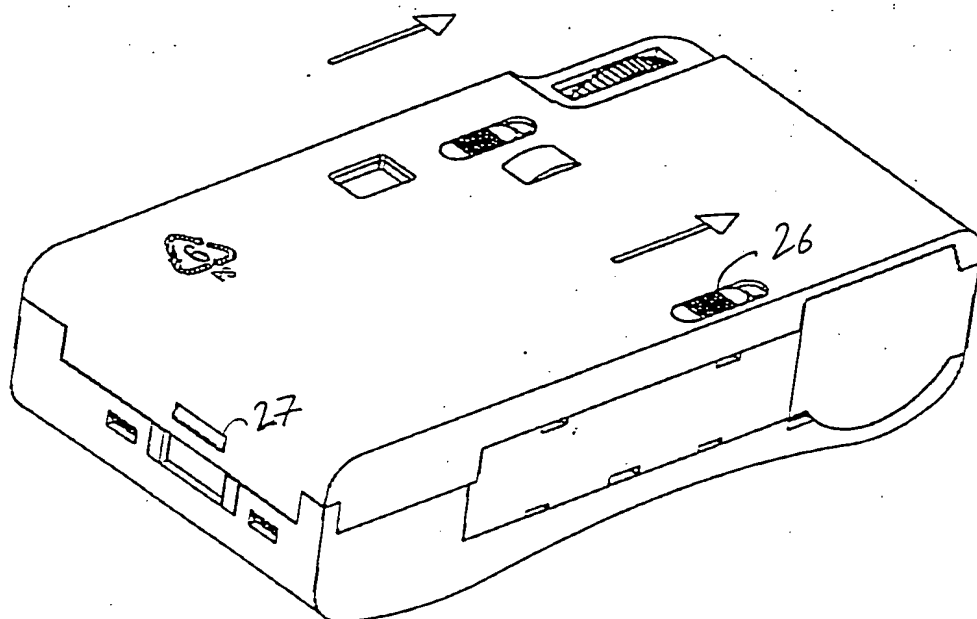

FIG. 7

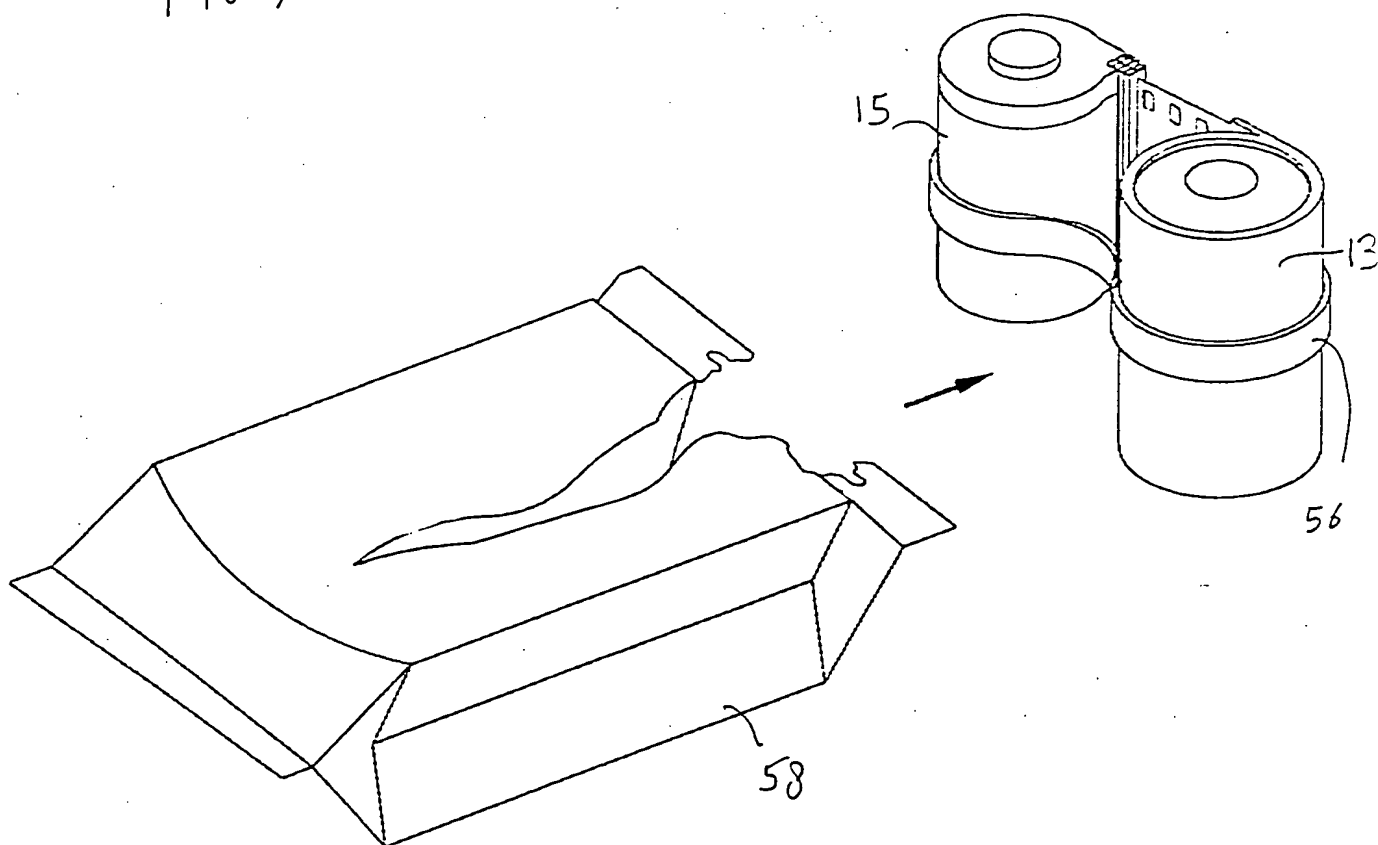

FIG. 8

FIG. 9 is a perspective view of the device 10 in an open position, showing the upper housing 12 and the lower housing 14. The upper housing 12 is shown with a lid 15 and a base 16. The lower housing 14 is shown with a lid 17 and a base 18. The device 10 is shown in a perspective view, with the upper housing 12 and the lower housing 14 separated from each other. The upper housing 12 is shown with a lid 15 and a base 16. The lower housing 14 is shown with a lid 17 and a base 18. The device 10 is shown in a perspective view, with the upper housing 12 and the lower housing 14 separated from each other.

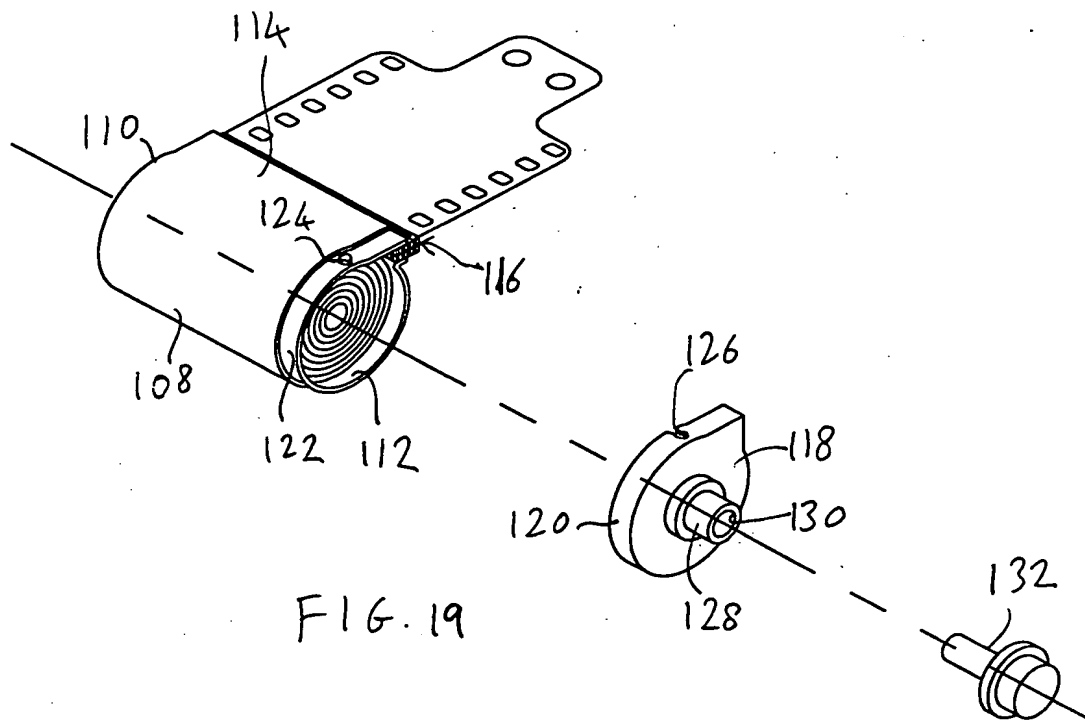

FIG. 19

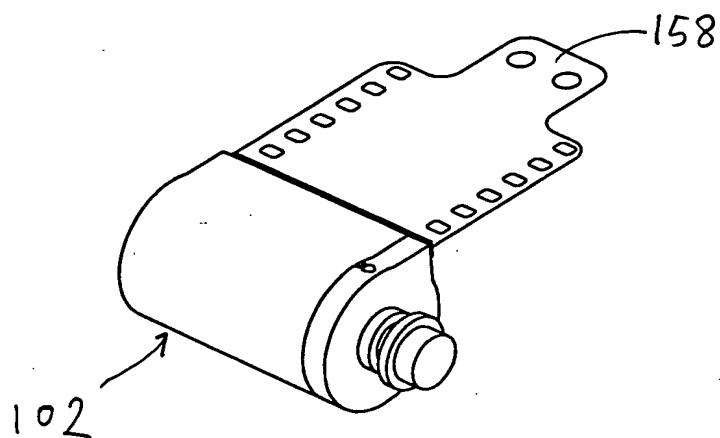

FIG. 20

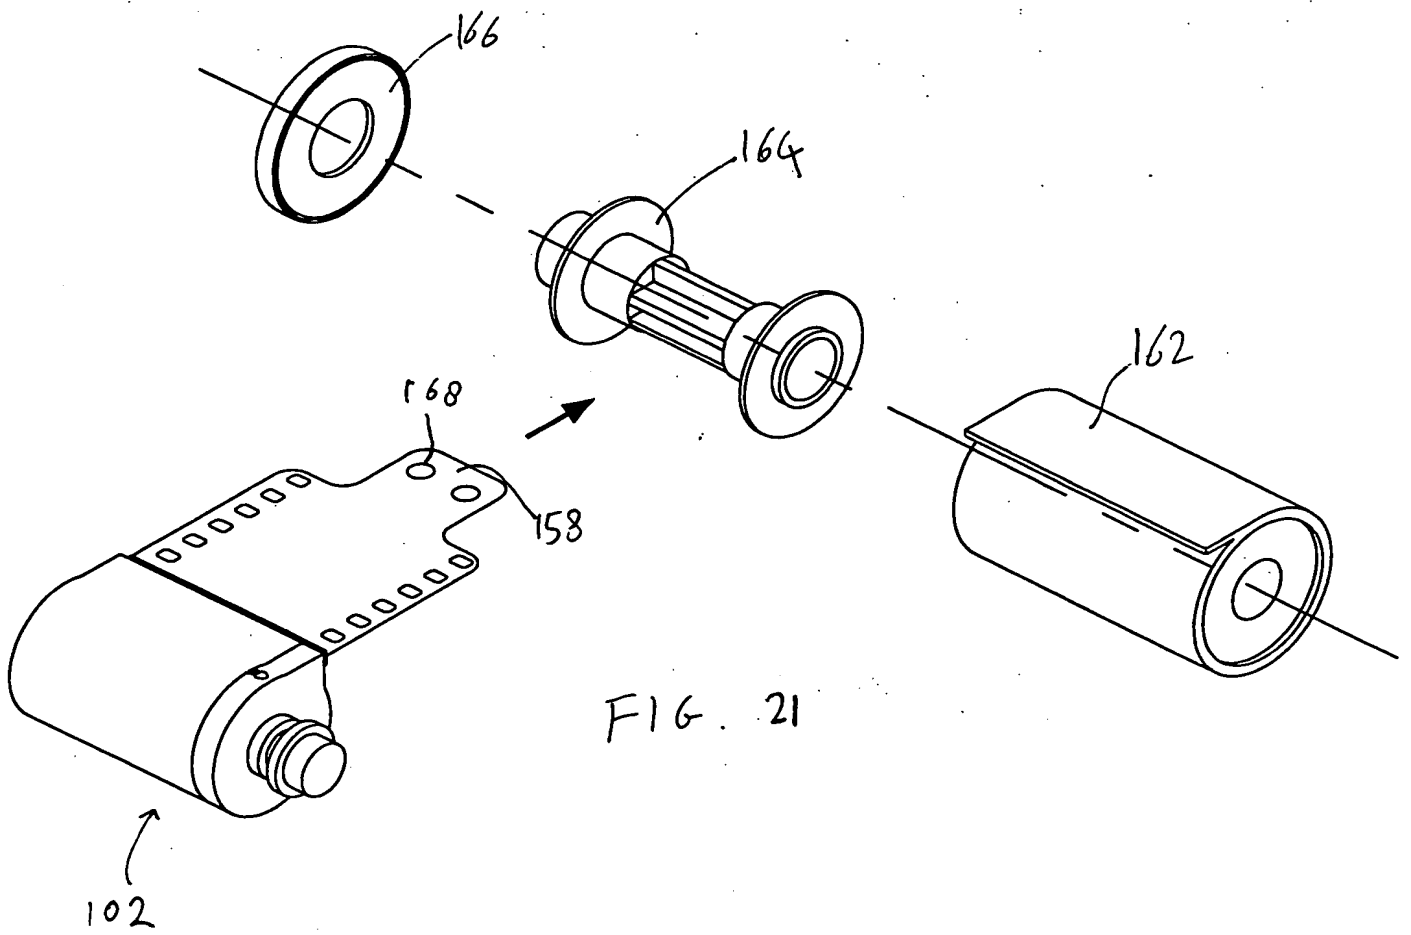

FIG. 21

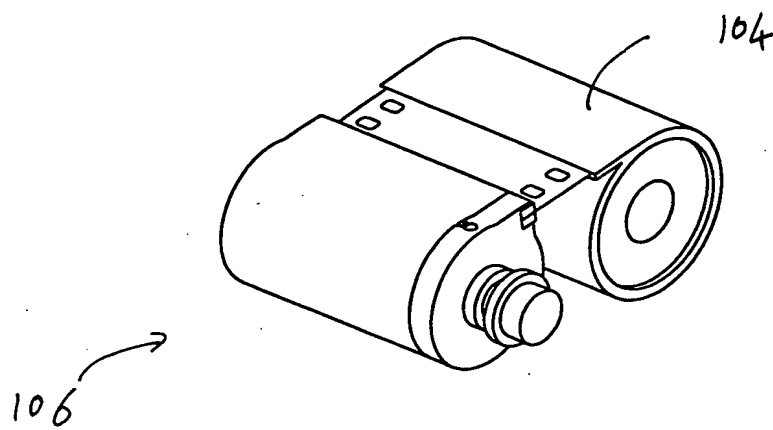

FIG. 22

FIG. 23 is a perspective view of the container 106 in an open position, showing the lid 56 and the container body 106. The lid 56 is hinged to the container body 106 and is shown in a partially open position. The container body 106 is a cylindrical container with a flared top edge. The lid 56 is a curved, flexible lid that fits over the top of the container body 106. The lid 56 is shown with a hinge mechanism that allows it to swing open and closed. The container body 106 is shown with a flared top edge that fits snugly against the lid 56. The lid 56 is shown with a hinge mechanism that allows it to swing open and closed. The container body 106 is shown with a flared top edge that fits snugly against the lid 56.
